Project Management Office

PMP Exam Preparation Course

"The average project manager salary nationwide is 80,854 \$" (Glassdoor: 2018)

Speak the language used by over 900,000 certified project managers around the globe and increase project's success rate in your organization.

Eng. Ziad El Dana

MEM, PMI-PBA, PMP, LEED GREEN ASSOC.
Senior Consultant and PMO Expert

PMI-RMP Exam Preparation Course

«In this business, by the time you realize you are in trouble, its too late to save yourself. Unless you are running scared all the time, you're gone.» Bill Gates

Spot troubles before happening, decrease your unpleasant surprises and be prepared for threats. The PMI-Risk Management Professional highlights your ability to identify risk as early as possible, assess project risks, mitigate threats and capitalize on opportunities to succeed in your project.

Dr. Ibrahim Kebbe

PhD, BE, ME, PMP, PMI-RMP
Risk & Project Management Consultant

Agile Certified Practitioner (ACP)

"A traditional project manager focuses on following the plan with minimal changes, whereas an agile leader focuses on adapting successfully to inevitable changes." — Jim Highsmith,

The PMI-ACP® is PMI's fastest growing certification, and it's no wonder. Organizations that are highly agile and responsive to market dynamics complete more of their projects successfully than their slower-moving counterparts — 75 percent versus 56 percent — as shown in our 2015 Pulse of the Profession® report

Mohamed Khalifa

LIMC, OPM3, PfMP, PMP, PMI-PBA, PgMP, PMI-RMP, PMI-SP, CAPM, PMI-ACP, CBAP, CCMAP, HRBP, SHRM-CP, CM, CKM, MCTS, CTT+, MCT
Senior Consultant

Applied Project Management

“9.9% of every dollar is wasted due to poor project performance— that’s 99\$ million for every 1\$ billion invested” (PMI: 2018)

If your objective is not the PMP certificate and you need the know-how, then this course is for you. It is designed for those who need a practical hands-on approach to manage projects from the early phases till closure. It combines theory with practice by using templates, checklists, and tips & tricks to develop a complete project management plan.

Mohammad Sabbouh

PMP, PMI-PBA, PMD

Consulting Services Manager / Partner

Project Planning and Scheduling

“How does a project get to be a year behind schedule? One day at a time.” Fred Brooks
As a project manager, you need to be proactive and ready to catch up before your project falls behind since changes in project schedule are inevitable.

Learn the key concepts of planning & scheduling and practice the tools & techniques for scheduling, optimizing plans, monitoring progress and controlling changes.

Dr. Mohammad Moutawei

PhD, PMP, PMI-RMP, PMI-PBA, AUC-PCT

Senior Consultant / Trainer

Effective Project Controls for Engineering & Construction Projects

If you are a project manager, a controller, a Lead, or simply an engineer in Oil & Gas, infrastructure, utilities, or other capital projects; this course provides the needed knowledge about Project Controls in a simple yet structured system.

The main objective is to have enough visibility to discover gaps and variances to be able to take the needed corrective actions in a timely manner.

Ahmed Saleh Mokhtar

MSc.Eng, PMP, PMI-RMP, RCE

Senior Consultant / Construction Management Expert

Value Engineering

“Unnecessary cost is not what is saved at the beginning of the project through value engineering, but rather what is spent in excess of the initial bid price to fix it later.”

John Murray

A good design team will incorporate value engineering into the creative process, seeing it as a challenge instead of a limitation. Learn how to apply the principles of value engineering methodology, based on SAVE international, to control project costs and enhance project quality as part of total quality management.

Eng. Ahmed Maged

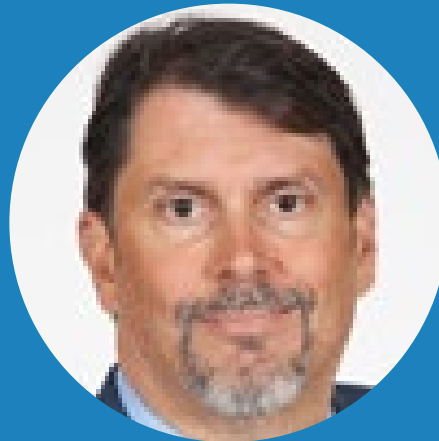

CVS, PMP

Senior Consultant

Cost Estimation and Budgeting

“Average percentage of projects completed within budget is 58%”, PMI

Cost management is one of the crucial aspects of project success. Projects are more and more facing the challenge of being planned and executed under limited budgets. Applying best practices for cost estimation, budgeting and control is essential to help organizations succeed in mastering this challenge.

Dr. Sean Regan

Ph.D, CCP, EVP, PSP, CEP, DRMP, CCT

Senior Project Manager
